

I would like to thank Dr. Kevin and Dr. Ed for showing me that I am capable of reaching a bigger vision. I am more aware of the impact that I have on children and all of the lives that I touch each and everyday.

Recently, I had a new patient come in to the office, from a yellow page \$47 initial visit coupon. He was a 19 year old, unemployed college student who had been to a Chiropractor before. In the past I would have categorized this patient as a 1 visit and out. This time I didn't, I played full out.

When he came back for his report of findings, I put my heart into it and gave the best report of findings ever! The patient walked up to the front desk and prepaid his initial intensive care on his credit card. It gets better, when he came in for his 2<sup>nd</sup> adjustment, he asked what chiropractic school he should go to, because after his last visit he decided to change his major to chiropractic!

The vision keeps growing. Another patient came in to tell me that her 2 ½ year old woke up from her nap and the first thing she said was "Can we go see Dr. Wilbraham?" The mother also added that every time they drive by the office she wants to come in and see me. She even went to the pediatrician and asked where I was.

This is what chiropractic is, the emotional connection!! Healthier People create a Healthier Planet!! The love keeps growing. Thank you Dr. Kevin and Dr. Ed for showing me how to PLAY FULL OUT!!
